

Lab 8 – ServletContext (application) Scope

- **Copy Lab07_RequestScope into a new project, Lab08_ServletContext**
 - Right click on Lab07 > Copy
 - Right click anywhere in Project Explorer > Paste
 - Rename the project

Lab 8 – ServletContext (application) Scope

In WelcomeServlet doPost, add an application variable to the ServletContext

```
//all server side resources need the same database connection  
  
ServletContext applicationScope = request.getServletContext();  
applicationScope.setAttribute("dbConnection", "jdbc:derby:student_db");
```

Make sure the code above comes BEFORE you forward

Modify the Developer Starter Page to also display the Database Connection

Developer Starter Page

Encrypted User Name: gnAls'Gs'mLJ

Database Connection is jdbc:derby:student_db
