Lab 5 - Includes

We're going to add the ability to show our current stock price in the header of every page

Copy Lab05_Includes_Starter into a new project named Lab05_Includes

It includes a new file, StockPrice
- See the com.music.model package
- Note the getStockPrice method that returns a double

We'll edit 4 files to demonstrate jsp:include
- header.html will be converted to header.jsp
- index.jsp, welcome.jsp, and songs.jsp, will be edited to use the new header page

Lab 5 - Includes

Create a new header.jsp page

Copy the company logo image from header.html

Add a scriptlet that calls getStockPrice and formats it to 2 decimal places

```
<%@ page language="java" contentType="text/html; charset=ISO-8859-1"
    pageEncoding="ISO-8859-1" import="com.music.model.StockPrice"  %>
<!DOCTYPE html>
<html>
<head><meta charset="ISO-8859-1"></head>
<img src="company_logo.svg" alt="Company Logo" width="300" height="100"/><br/>
Current Stock Price: <%= String.format("%.2f", StockPrice.getStockPrice())  %><br/>
<body>
</body>
</html>
```

Lab 5 - Includes

For index.jsp, welcome.jsp, and songs.jsp do the following:

Remove the include directive <%@ include file="header.html" %>

Use a jsp:include to include the new header.jsp

```
<body>
    <jsp:include page="header.jsp" />
```

Lab 5 - Includes

Every page changes at request time and should show a different stock price
